

ViewSonic introduces interactive 7 Series projectors

ViewSonic has announced the 7 Series range of 3D-ready projectors with interactive whiteboard capabilities.

Dispensing with the need for an interactive whiteboard, the PJD7383i features ViewSonic iProjector technology, enabling users to improvise an interactive whiteboard. Users can write directly onto the projected image with the included PointBlank Pen and without the need for alignment or calibration.

Additionally, for the education sector, the PJD7383i includes bundled ViewDraw software to assist this innovation, with seamless integration of the hardware and curriculum software.

The PJD7383i projects an 80-inch (203 cm) image from just one metre away. It is fitted with digital keystone correction, which squares images to correct proportion.

The PJD7382 also offers an extreme short throw ratio producing large, crisp images on a screen size of 80 inches from a distance of only one metre, ultimately saving space by allowing users to place the projector at the front of the table.

The compact PJD7382 weighs only 3.5 kg; features include 3000 lumens light source and a 3000:1 contrast ratio, multiple preset presentation modes, an increased 40 degree digital vertical, keystone correction and digital zoom.

The ViewSonic 7 Series projectors feature advanced Crestron network control using the local area network to enable a central IT department to monitor the status of the devices at all times. This takes the responsibility for maintenance and management away from the user.

Equipped with a USB wireless dongle with a WiFi range of up to 328 feet and a driverless and auto display USB presentation functionality, allows the user to run a presentation without connecting to a PC.

All ViewSonic 7 Series projectors feature USB and LAN display, providing the flexibility to choose how to send content to the device, either via USB or LAN instead of a video cable.

Recommended retail prices: ViewSonic PJD7382 \$1999.00; Viewsonic PJD7383i \$2599.00.

Affordable laptop accessories

Targus has launched a line of affordable laptop accessories. Priced from \$19.95, the range includes: an USB Optical Laptop

Mouse (RRP \$19.95) with a 1000 DPI optical sensor and integrated scroll wheel which suits both left and right-handed users. It comes with a 1.8 m USB cable. Three- and five-button mice are also available at \$19.95 and \$29.95 respectively.

The Chill Mat for Laptops (RRP \$39.95) is fitted with two fans to provide a stream of cool air. This encourages faster performance, fewer crashes and provides heat protection for all work surfaces. The chill mat plugs directly into laptop USB ports without the need for external power, while rubber grips ensure the laptop doesn't move while in use.

The compact four-Port Value Hub (RRP \$19.95) transforms one USB port into four, providing easy access and connectivity to devices such as mice, digital cameras and memory drives. This nifty hub provides the convenience of added ports without the burden of bulk. It offers a fast transfer rate of 480 Mbps and does not require an additional power supply. A seven-port model is also available (RRP \$59.95).
