**Expansive Education**  
*Teaching learners for the real world*  
 Bill Lucas, Guy Claxton and Ellen Spencer  
 Acer Press and Open University Press  
 ISBN 9781742861104  
 \$24.95 (ACER Bookshop)  
 The authors of this interesting book work at the Centre for Real-World Learning, University of Winchester in the UK.

They have coined the expression '*expansive education*' to describe an approach to education which is increasingly being taken up internationally.

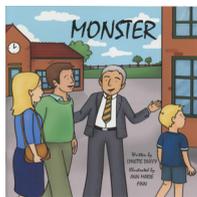

They explore the purpose of education in a rapidly changing world. In this context they analyse the thinking and science behind the idea of expansive education and describe some of the pioneering work that is being undertaken.

Expansive education, the authors state, is expansive in four senses:

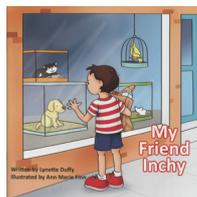

- It seeks to expand the goals of education
- Expanding young people's capacity to deal with the tests of life
- Expanding the compass beyond the school gates
- Expansive education has profound implications for the role of teachers.

The book showcases schools and organisations that are developing methods of teaching and learning that cultivate powerful learners.

Why go to all that trouble when there is a plethora of books that aim to help children deal with their problems? This reviewer likes the illustrations by Ann Marie Finn, the square format, and the few pages, the latter qualifying both books as quick bedtime reads. Events in *Monster* reminded the reviewer of his first weeks at a boarding school.

*Monster* tells about the problems Ben, a country kid, faces when he's packed off to boarding school. He's picked on and put down by teachers and kids. When staff and children start to call him Monster, he decides to act like one. It all comes out right in the end when his parents arrive for a crisis meeting with the principal. Ben explains what has been going on, he's moved to a shared bedroom and makes friends.

*My Friend Inchy* is a tale about Timothy, a small boy who lives in a little house with his mother. He's lonely and wants a pet. Sent on a shopping errand, he buys a puppy with the grocery money and takes it home. Mum, of course, doesn't want a dog so Ben repeats the process with a kitten, a canary, a mouse and finally a frog – which escapes down the drain. He finds the ideal pet when he picks up a leaf and sees a caterpillar on it. He calls it Inchy because that's the way it walks up his arm. The caterpillar thrives, turns into a chrysalis and emerges as a butterfly, which flies out of the window. Tears turn to smiles when the butterfly returns and walks up his arm like Inchy used to do.
